Regardless of the project size, scope and location, or whether it involves a residential development, industrial manufacturing facility, institutional building, high-rise office tower, airport, shopping mall or distribution center — The Euclid Group offers an extensive range of specialty construction chemicals.

Our global portfolio includes admixtures, adhesives, sealants, protective coatings and waterproofing membranes among many other construction products. Our products have been designed to protect the construction material or the finished structure where they are used by improving workability, enhancing performance or adding functionality.

A Geographical Sales and Manufacturing Footprint Spanning Six Continents...

The Euclid Group is able to leverage its existing markets, sales channels, brands, production and logistic operations across the globe to rapidly introduce new product lines as well as service global customers to the same high standards throughout the world.

The Euclid Group boasts 34 plants worldwide operating 72 manufacturing processes. The combined capabilities of The Euclid Group positions it as a progressive solutions provider, uniquely tailored to take on the challenges of the modern construction industry regardless of location.

KEY: Manufacturing Distribution Commercial Office

Committed to Developing Solutions That Support a Sustainable Future...

The Euclid Group strives to ensure that all operations fall within the parameters of a sustainable code.

Constantly analyzing products and processes through a green lens ensures that we are able to offer solutions that meet the highest standards of sustainable construction without sacrificing functionality, price or practicality.

By implementing sustainability initiatives throughout operations, infrastructure and logistics, The Euclid Group has become a preferred supplier for developers seeking global standards and looking to attain important green building accreditations.

Focusing on green chemistry and solvent-free, water-based coatings technologies is lowering our environmental impact.

As a member of the USGBC, we are able to supply a wide range of materials that assist in attaining LEED credits.

Successful smart packaging initiatives are helping to reduce the volume of waste being sent to landfill across the globe.

Award-winning energy reduction strategies are helping to make manufacturing processes more energy efficient.

Fiber reinforcement technology is reducing the carbon footprint involved in concrete construction.

ISO 14001

Many of our manufacturing plants across the world operate in accordance with ISO 14001 Environment Management System (EMS).

A photograph of two men in a warehouse. The man on the left is older, with grey hair, wearing a grey shirt, a dark tie, and a yellow high-visibility vest. He is looking upwards and to the right. The man on the right is younger, with a beard, wearing a light blue polo shirt and a yellow high-visibility vest with the Euclid Group logo. He is also looking upwards and to the right. The man on the left is holding a tablet computer. The background shows warehouse shelving with cardboard boxes. The text is overlaid on an orange semi-transparent box on the left and a white semi-transparent box on the right.

An Employer of Choice for Over 2,100 People in More Than 50 Countries...

The Euclid Group's dedicated and ambitious employees work hard to deliver the best products and services possible, supported by a company that values initiative, creativity and continual innovation.

The Euclid Group's philosophy is centered on hiring the best people possible and providing them with the tools, training and independence to do the best job that they can do.

The Euclid Group Foundation is the soul of the organization, providing a set of core values, which guide employee behavior, decisions and actions as well as underpin the Group's global workplace culture.

The Euclid Group Foundation is dedicated to the pursuit of global expansion through the sustained development of our people, products and services with the aim of being the world's leading construction chemicals business.
